Jeff,

Sorry, I was out Friday. Yes, I can forward you that, along with our Summa Canister Results. I will do that right now.

Craig

Craig-

Is it possible for you (or Weston) to forward to us a copy of the laboratory data, from the potable well re-sampling?

I'd like to take a look at it, compare results and detection limits, etc.

Please advise.. thanks!

Jeff,

Thanks for the update. Our split samples from the potable well re-sampling at 1525 Hawkins and 1756 IL-113 did not detect anything.

I had Dr. Mark Johnson with ATSDR look over the results from our 24-Hour Summa canister samples (collected last Thursday morning). We did have few low detects, but nothing that appeared to be a health-issue. I have passed that information on to the State and Kalamazoo County.

Thanks!

Craig,

Attached you will find data tables containing the FINAL data for potable well, surface water, and soil samples that we have received from the laboratory to date. Total waste accumulations as of this afternoon are as follows:

Water → 89,878

Product → 430 gallons

Soil → 1,252

Please note that I will be resuming Agency updates for Wood River Pipe Lines LLC, in lieu of Krista.

Feel free to contact me if you need any additional information.

Thanks,

Jeff W. Brudereck
